PRINCE OF SONGKLA UNIVERSITY  
FACULTY OF ENGINEERING

Mid-term : semester 1

Academic Year : 2004

Date : August 2, 2004

Time : 13.30 – 16.30

Subject : 225-345 Engineering Economy Room : R300

**Instruction**

1. Attempt all questions.
2. Write answers in this examination paper.
3. All materials are allowed in to the examination room.
4. Total pages are 8 pages.
5. The points are as follows :

Question No	1	2	3	4	5
Full points scored	19	17	12	14	13

ทูลจตุรติในการสอบ โทษขั้นต่ำคือปรับตกในรายวิชาที่ทูลจตุรติและพักการเรียน 1 ภาคการศึกษา

1. A factory produces 5 products : A, B, C, D and E. The annual revenue of the factory is ₦ 5,000,000, and fixed cost is ₦ 1,070,500. The variable cost per unit, price per unit and total revenue are as below table :

Item	variable cost per unit (₦/unit)	price per unit (₦/unit)	total revenue (₦)
A	40	50	2,000,000
B	48	60	1,500,000
C	64	80	750,000
D	75	100	450,000
E	80	125	300,000

Fill only answers in to the below blankets :  
(19 points)

item	marginal cost/unit (₦/unit)	total marginal cost (₦)
A		
B		
C		
D		
E		

$$AMC = \text{_____} \times$$

$$= \text{_____} \%$$

3. A company purchases a machine ₪ 5,000,000. The machine has a life time 6 years and salvage value is ₪ 500,000.  $R = 0.4$ .

Fill only answers in to the below blankets :  
(12points)

3.1 The straight line depreciation of year 3 is

\_\_\_\_\_ baht.

3.2 The declining balance depreciation of the year 6 is

\_\_\_\_\_ baht.

3.3 The sum of the years digit depreciation of year 4 is  
baht. \_\_\_\_\_

3.4 The book value of year 5 with declining balance depreciation method is

\_\_\_\_\_ baht.

3.5 The book value of year 2 with the sum of the years digit depreciation method is

\_\_\_\_\_ baht.

3.6 The cumulative depreciation of year 4 with the declining balance depreciation method is

\_\_\_\_\_ baht.

Name \_\_\_\_\_ ID.number \_\_\_\_\_ department \_\_\_\_\_

4. A company purchases a boiler for 3,000,000 baht, which would have an economic life of 8 years and be worth ₪ 500,000 in salvage value at the end of that time. The estimated annual revenue which will accrue will be ₪ 800,000. It is estimated that the operation and maintenance costs would be 10,000, 20,000, 30,000, 40,000, 50,000, 60,000, 800,000 and 100,000 baht from the first year to the year eight, respectively. The policy of minimum attractive rate of return is 15%. What is the internal rate of return? What is the conclusion of this project?  
( 14 points)
