# PRINCE OF SONGKLA UNIVERSITY FACULTY OF ENGINEERING

Midterm Examination: Semester 1 Academic Year: 2005

Date: July 30, 2005 Time: 9:00-12:00

Subject: 226-401 Machining Technology Room: Robot

#### **Instructions**

• This is a **closed-book** examination.

• Calculator and notes are **not** allowed.

• There are 5 questions in 7 pages.

• Total score is 50.

#### **List of Equations**

$$\tan \phi = \frac{(a_c / a_0) \cos \gamma_{n_e}}{1 - (a_c / a_0) \sin \gamma_{n_e}}$$

$$F_s = F_c \cos \phi - F_t \sin \phi$$

$$A_c = A_s \sin \phi$$

ทุจริตในการสอบ โทษขั้นต่ำ คือ พักการเรียน 1 ภาคการศึกษา และปรับตกในรายวิชาที่ทุจริต

**Problem 1:** How many types of chip, produced during metal cutting? Give the name and describe the characteristic of each type. (10 points)

## Problem 2: For an operation of metal cutting; (10 points)

2.1 Explain temperature distributions in metal cutting where the heat was generated and transferred to.

2.2 Draw in the figure below to identify the highest temperature.

**Problem 3:** 1 inch diameter shaft and 10 inch long is to be produced from a mild steel shaft with 2 inch diameter of 14 inch in length by a turning operation at a feedrate of 0.01 inch per rev and a depth of cut 0.05 inch. Calculate (10 points)

- 3.1 How many cycles have to be machined?
- 3.2 If same spindle speed of 250 rpm was used for each cycle in Question 3.1, what is the total machining time?
- 3.3 Give the name of each surface on the workpiece and identify in the figure below.

Name	•••••
Student ID	

Problem 4: In an orthogonal cutting test on mild steel, the following results were obtained: (10 points)

Width of chip = 2.0 mm, Undeformed chip thickness = 0.50 mm,

Working normal rake =  $0^{\circ}$ , Chip thickness = 0.50 mm,

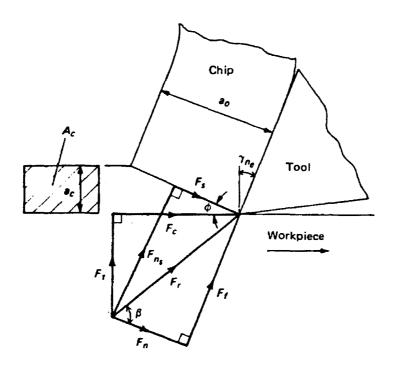

Cutting force = 900 N, Thrust force = 600 N

### Calculate

4.1 The shear angle

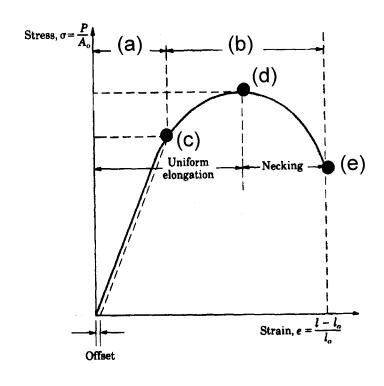

4.2 The mean angle of friction of the tool face

4.3 The mean shear strength of the work material, in meganewtons per square metre  $(MN/m^2)$ 

Name ......
Student ID ......

**Problem 5:** From the stress-strain curve below, give the name and explain the meaning of each point. (10 points)

Region (a)	 	 	
		<u> </u>	
Region (b)			
Position (c)			
``			
Position (d)			
Position (e)
